

*Bring your Exhibits Alive™*

*with sound, images and motion to attract  
and engage visitors as only video can.*

*Let video tell your town's story, explain a refining process  
or convince viewers to support a wildlife sanctuary.*

With Signal-Innova's FlashVideo LP connected to a video monitor or TV screen, it's easy to add video to your exhibits and displays. The high quality stereo Digital Video Player can play a video loop all day unattended or be controlled by a handheld remote.

Using convenient CompactFlash™ (CF) memory cards for storing video segments, Signal-Innova's FlashVideo LP makes it easy to update, interchange and replace videos.

## FEATURES

### COMPACT SIZE - FITS IN SMALL SPACES

The small size (8" x 5.25" x 1.63") of FlashVideo LP allows for installation in tight spaces such as kiosks or in small exhibit housings.

### NO MOVING PARTS - EXTREMELY RELIABLE

Use of Compact Flash™ cards for video storage and access eliminates mechanical problems associated with videotapes, laser disks and DVD players.

### UNATTENDED LOOPING PLAYBACK

FlashVideo LP's looping feature simplifies unattended playback of video segments. Pause, File Selection and Fast Forward features of the Remote Control provide added flexibility. For pushbutton selection of video segments, please inquire about Signal-Innova's FlashVideo PB.

### EASE OF UPDATING CONTENT

The use of non-volatile CF memory cards makes it easy to update or change video segments. Use the built-in USB interface or an inexpensive CF card reader/writer with a computer to load new video files.

### STANDARD FORMATS (INPUTS)

FlashVideo LP uses MPEG1 (Video CD) and MPEG2 (DVD) (up to 6Mb/sec VBR) file formats for professional quality output. MP3 audio is also supported.

### STANDARD FORMATS (OUTPUTS)

FlashVideo LP outputs NTSC or PAL Composite Video or S-Video.

Audio output is stereo L/R with RCA jacks.

### FLASHVIDEO LP STANDARD PACKAGE

- 1 FlashVideo LP unit (8.0" x 5.25" x 1.63")
- 1 Remote Control
- 1 Power Supply (Input: 100-240V 50/60 Hz/ Output: +12v)

### OPTIONAL:

- Compatible video monitor
- Video-to-Monitor Adapter (VMA) for use with VGA monitors
- CompactFlash™ Card & CF card reader/writer
- Video editing services; file conversion services
- Video file sourcing service
- Custom expanded system design and configuration

### ABOUT COMPACT FLASH™ CARDS:

FlashVideo LP functions better with some brands and speeds of CF cards than others. CF cards supplied by Signal-Innova have been tested for compatibility. If you prefer to supply your own CF card, please keep in mind that some brands and speeds could be problematic.

*CompactFlash™ is a U.S. registered trademark of SanDisk Corporation.*

## SUGGESTED APPLICATIONS

- Museum exhibits
- Zoo & aquarium exhibits
- Traveling exhibits
- Trade show & convention exhibits
- Corporate lobby exhibits
- Fund-raising displays
- Interactive exhibits
- Diorama backgrounds & environment
- Dramatize historical displays
- Nature & animal videos to enliven, educate and entertain
- Special video effects for excitement
- Background video for motion
- Share oral histories
- Your unique application
